KG:33

73% JUICE EXTRACTION BY WEIGHT OF SUGARCANE BY SINGLE CRUSHING

As compared to the other similar machines in the market, our machine does not require periodical lubrication. also it is very economical, consuming as low as 2 HP (400 Watts). This means you do not end up with a high electricity bills at the end of the month. This point everyone should minutely consider before deciding on a machine. This actually means you earn more rather than spend more.

Technical Specifications

MOTOR DETAILS

HP	0.5
KW	0.38
MOUNTING TYPE	INBUILT
RPM	1440
PHASE	SINGLE
WATT	400

**SUPER HYGIENIC, HIGH GRADE STAINLESS STEEL BODY,
SO NO RUSTING.**

Juice is extracted completely in single crushing. No second crushing required.

Very compact, can be moved from one place to another easily.

Very efficient, sturdy and noiseless. Very simple and easy to operate, even a child can easily operate it.

Runs on single phase, so can be used anywhere. (Where there is electric connection.)

No maintenance required except regular cleaning. Very easy to clean.

Power consumption is very economical

No open parts as in traditional sugarcane crushers. So contamination from flies and dust is avoided.

All contact parts made of stainless steel.

Sugarcane Juicer
